PikesSoft

📍 Near Emporium mall Johar Town Lahore

Front End Developer

- Keyki

Created tables in UI show the list/data REST API.

Made admin/customer layout with Umi Js.

In customer side made tables and forms (Ant Design) to collect data from customer like categories and subCategories. User request to the admin to approve his products.

On the admin side make a function to approve or decline customer requests.

Customer/admin can edit, update and delete their data.

Write a script in JavaScript for admin to approved all request at a time to save the time.

Made function that showed only allow approved categories at Home Page and decline.

2022 - 2023

Atthetech

📍 Rehman Garden Faizpur Interchange Lahore
